

Fire Training Drill towers

As part of the rollout of the UK cellular networks, the Swann Group has undertaken a number of surveys and assessments on behalf of clients wishing to install base station antennas on existing Fire Station Drill Towers. Swann Group have analysed a range of Fire Training Drill Towers and subsequently upgraded the structures to enable the cellular operators to install their antennas and associated radio equipment.

More recently the Group designed, manufactured, installed and commissioned a new training structure at Grange-on-Sands Fire station in Cumbria.
