

ICNIRP – Compliance Surveys

Swann Services Group was retained by a leading UK cellular operator to carry out surveys of rooftop sites to demonstrate compliance with the ICNIRP guidelines currently being adopted across the UK.

In addition Swann Services was responsible for recommending and undertaking all remedial works that were necessary to make the sites compliant. Works consisted of antenna relocations, provision of physical barriers around antennas or other systems to prevent access within the antenna RF exclusion zones.

The project encompassed sites on over one thousand buildings across the country and was completed within very tight timescales

The scope of work included:

- Preparation of the survey programme
- Coordination of site access
- Carrying out site surveys
- Audit of sites against ICNIRP criteria
- Identifying and quantifying problems
- Developing solutions
- Producing drawings, budgets and programmes for remedial works
- Data management
- Client reporting
- Certification
